

TP1 Plan

Team:
Sutton Harr,
Rufat Babayev,
Ahad Mammadli

Sprint window covered by this plan: **2026-01-29 to 2026-02-11**

Note: This is a planning + tracking sheet. Update statuses during/after meetings.

Week of 1/29

- Team meeting: 1/30 (scope + ownership split)
- Goal: get the baseline flows working end-to-end (login, first-user setup, role routing)
- Screencast clips: capture short check-ins during meeting or after merges

Weekly responsibilities (plan)

- SUTTON: draft Sprint Backlog PDF + TP1 Plan; wire first-user setup (NU-01) and basic role model
- RUFAT: implement validation helpers + UI error states; start InputValidation doc screenshots as features land
- AHAD: set up repo structure / README + build/run notes; implement login routing (NU-03/NU-04) and logout (NU-05)
- NOTE: NU-04 reallocated to Sutton

Week of 2/5

- Team meetings: 2/6 and 2/10 (review + polish)
- Goal: finish Admin flows + clean validation + stabilize UX for screencast #1
- Freeze changes on 2/11 except bug fixes and doc screenshots

Weekly responsibilities (plan)

- SUTTON: implement Admin invites + one-time join codes (ADM-01); review/merge PRs; keep backlog statuses updated
- RUFAT: implement reset/one-time password flow (ADM-02) + finalize InputValidation doc content/screens
- AHAD: implement delete/list/role mgmt (ADM-03/ADM-04/ADM-05); sanity-check edge cases (self-delete, last-admin)
- NOTE: ADM-05 reallocated to Rufat

Closeout (2/11)

- Record Screencast #1 (code demo of required stories)
- Quick regression pass: first-user setup, login routing, admin actions, logout, validation messages
- Finalize PDF docs required for TP1 submission (filenames match exactly)
